

The 2002 “Smart Home” Contest!

Contest Instructions:

1. Design a “Smart Home” that uses a fuel cell as its primary power source.
2. Submit a simple design and sketch to Breakthrough Technologies/Fuel Cells 2000 by July 31.
3. Fuel Cells 2000 (www.fuelcells.org) will post the winning designs on a special web page showcasing residential fuel cell power.
4. Designs will be judged on energy efficiency, sustainability, degree of environmental impact and liveability. Smart homes are energy-efficient, constructed of earth-friendly materials, and make minimal impact on the environment.

Email, fax or mail your entry by July 31, 2002 to:

maria@fuelcells.org; (202) 785-4313 or Breakthrough Technologies Institute, 1625 K St. N.W., Suite 725, Washington, DC 20006. Questions? Call Maria Bellos at (202) 785-4222, ext. 16.
